24 JAN 1968

SUBJECT: Operational Report-Lessons Learned for Quarterly Period Ending
31 October 1967 RCS CSFOR-65 UIC WAITAA 6th Bn, 32d Arty

THRU: Commanding General
I Field Force, Vietnam
APO 96350

TO: Commanding Officer
6th Battalion, 32d Artillery
APO 96316

1. Reference: Operational Report for Quarterly Period Ending 31
October 1967, 6th Bn, 32d Arty, dated 5 November 1967.

2. The recommendation in paragraph 2a, page 12 of the reference
lacks sufficient detail upon which corrective action can be initiated.

3. Request clarification of the recommendation to include as a
minimum:

a. Detailed training deficiencies noted in personnel or units
arriving in Vietnam.

b. Type of battery training requiring emphasis.

c. Course, school or level of training where emphasis should
be provided.

d. Percentage of personnel arriving in the unit considered un-
qualified.

e. Type of firing which should be emphasized (individual weapons,
crew served, artillery, etc.).

f. Percentage of personnel arriving in the unit considered un-
qualified in specific weapons.

2nd Ind

SUBJECT: Operational Report - Lessons Learned for Quarterly Period Ending
31 October 1967 RCS CSFOR-65 UIC WAITAA 6th Bn, 32d Arty (U)

Headquarters, 6th Battalion, 32d Artillery, APO 96316 14 Feb 68

TO: Commanding General, I Field Force Vietnam, APO 96350

1. The paragraph in question applies to deployment of units to RVN and does not generally apply to individual replacements with the exception of paragraph 3 and 4 below.

2. Prior to deployment this unit was required to undergo a Technical Proficiency Inspection and a Battalion Army Training Test, consequently a great deal of the available training time was devoted to meeting these goals. This training time could have been much more effectively utilized if it had been devoted to independent battery training emphasizing the "around the clock, around the compass" concept. The necessity for establishment of the long lines of communication, for administrative and logistical support between the batteries and the Headquarters and Service elements could have been emphasized.

3. Nearly 50% of the section chiefs and gunners assigned to this Battalion as replacements have had little or no experience on the M107 Gun or M110 Howitzer. Since light, medium and heavy Artillery Section Chiefs no longer have different MOS's, a close screening at the replacement/assignment agencies is essential to get the experienced supervision to the unit where they are most needed.

4. Replacements in the lower grades that have just completed AIT or service school generally have had no training on the .50 cal. M.G. or LAW, 25% have had little or no training on the M60 M.G. or M79. Although almost 90% have a limited knowledge of the M16A1, very few have fired the train-fire course with that weapon.

5. The more training individual replacements receive in areas of emphasis for Vietnam assignment prior to deployment, the less trouble they have adapting to their job responsibilities upon arrival. This training should be conducted at AIT or the losing unit.

3d Ind

SUBJECT: Operational Report-Lessons Learned for Quarterly Period Ending
31 October 1967 RCS CSFOR-65 UIC WAITTA 6th Bn, 32d Arty (U)

HEADQUARTERS, 41st Artillery Group, APO 96368

20 March 1968

TO: CG, I Field Force Vietnam Artillery, APO 96350

1. Concur with 2d Indorsement.

2. Reference para 2, TPI for units deploying to RVN is not necessary. While it would be difficult to prescribe a POM training program which would include all aspects of RVN-peculiar situations, the standard battalion and battery training tests cannot be relied upon as the sole vehicle for unit POM training. Concur that extended field exercises at battery level be included in POM training with emphasis on improvement of position, field sanitation, defense of the battery position, direct fire procedures and construction of bunkers with overhead cover.

3. Reference para 3, increased training on heavy weapons for selected cannoneers is recommended. Training should be conducted following ATT. Chiefs of section need additional training in use, checks, and adjustment of on carriage fire control equipment and maintenance of M107/M110.

CHARLES W. BINNEY
Major, Artillery
Adjutant
